## Quartz

Quartz is an engineered stone. It is durable, antimicrobial, and maintenance-free. Quartz's non-porous surface blocks liquids and stains from penetrating through the stone, and therefore, quartz countertops do not have to be sealed. As quartz is manmade, its slabs usually have a uniform pattern.

# FLOORING

Flooring brings the whole room together. We provide a variety of choices, from soft grey to rich walnut, including SPC, engineered wood, and laminate to accommodate your decoration needs.

## Features

### SPC

SPC is waterproof, wood-look flooring that provides an attractive and durable option for high traffic areas. It is resistant to water and prevents moisture buildup, allowing for easy maintenance and worry-free cleaning.

### Laminate

Laminate flooring is a multi-layer synthetic flooring. The inner layer is made of melamine resin and fiberboard materials. Laminate flooring is comparably less expensive than hardwood flooring, aesthetically beautiful and natural, and requires less effort to install.

### Engineered Wood

A layered product consisting of a hardwood slice on a high-quality plywood base, engineered wood is a usable solid wood alternative. It is made to meet the demands for a construction material that is lower-cost but equally durable.
